LOADING AND UNLOADING

Unloading takes place via a closed loading bay. The rehearsal space -2 is located in the basement and for set pieces it is only accessible using a lift (3,0m x 3,0m x 3,0m).

PLEASE NOTE: approaching the loading bay with a trailer is difficult. Please inform us in advance if you plan to arrive with a trailer, as we will need to request a parking ban for the street.

DESCRIPTION

Rehearsal space -2 can be completely blacked out and has a wooden floor (vinyl dance floor can be provided). The ceiling in one part of the space is lower. Basic lighting and sound equipment is provided. A construction with trusses and electrical motors makes it possible to hang objects.

Total floor area: 12,6 m wide x 21,2 m deep

Low part: 12,6 m wide x 9 m deep x 5,3m high

High part (stage area): 12,6 m wide x 12,2 m deep x 6,5m high

Size construction with trusses: 10m wide x 8m deep.
