LOADING AND UNLOADING

The dance studio is located on the fourth floor and can only be reached using a **passenger lift**. The studio is not accessible for large set pieces.

Lift dimensions:

1,29 m W x 2,09 m H x 2,51 m D

PLEASE NOTE: approaching the loading bay with a trailer is difficult. Please inform us in advance if you plan to arrive with a trailer, as we will need to request a parking ban for the street.

STAGE

The dance studio is a flat floor space without seats and with a fixed grid.

Floor area: 18,5 m wide x 18,4 m deep x 5,4 m high

The floor is a floating light-wooden floor clad with black dance vinyl.

The left wall is covered in ceiling-high mirrors.

One side consists of windows looking out over Brussels.

The room can be blacked out using ruby curtains.

LIGHTING

Rigging of lights and cables in the dance studio has to be done with a hydraulic platform or a ladder and is therefore a time-consuming effort. It is advisable to keep the lighting plan as simple as possible during rehearsals.

The standard configuration is 2 x 6 PC's 1kW front lights , 3 x 6 PC's 1kW back- and top lights and 2 x 4 PC's 1kW side lights.

Standard equipment

24 dimmers 3kW
